

AMENDMENTS TO THE CLAIMS

1-37. (Canceled)

38. (New) A method of treating cancer in a subject, comprising topically administering to a subject in need thereof a composition comprising a therapeutically effective amount of between about 0.01% and 30% w/w of Coenzyme Q10, thereby treating cancer in the subject.

39. (New) A method of treating cancer in a subject, comprising topically administering to a subject in need thereof a composition comprising an effective amount of between about 1.5 and 4.0 mg of Coenzyme Q10 per kg of body weight of the subject, thereby treating cancer in the subject.

40. (New) The method of claim 38 or 39, wherein the subject is human.

41. (New) The method of claim 38 or 39, wherein the composition comprising Coenzyme Q10 is formulated as a topical cream.

42. (New) The method of claim 38 or 39, wherein the composition comprising Coenzyme Q10 is liposomal.

43. (New) The method of claim 38, wherein the composition comprises about 1% to about 25% w/w of Coenzyme Q10.

44. (New) The method of claim 38, wherein the composition comprises about 1% to about 20% w/w of Coenzyme Q10.

45. (New) The method of claim 38 or 39, wherein the cancer is selected from the group consisting of a melanoma, carcinoma, sarcoma, leukemia and lymphoma.

46. (New) The method of claim 38 or 39, wherein the cancer is a melanoma.

- 47. (New) The method of claim 38 or 39, wherein the cancer is a carcinoma.
- 48. (New) The method of claim 47, wherein the carcinoma is squamous cell carcinoma.
- 49. (New) The method of claim 47, wherein the carcinoma is breast adenocarcinoma.
- 50. (New) The method of claim 47, wherein the carcinoma is hepatocellular carcinoma.
- 51. (New) The method of claim 47, wherein the carcinoma is prostatic adenocarcinoma.
- 52. (New) The method of claim 38 or 39, wherein the cancer is a sarcoma.
- 53. (New) The method of claim 52, wherein the sarcoma is an osteosarcoma.
- 54. (New) The method of claim 38 or 39, wherein the cancer is selected from the group consisting of skin cancer, breast cancer, prostate cancer, liver cancer and bone cancer.
- 55. (New) The method of claim 54, wherein the cancer is skin cancer.
- 56. (New) The method of claim 54, wherein the cancer is breast cancer.
- 57. (New) The method of claim 54, wherein the cancer is prostate cancer.
- 58. (New) The method of claim 54, wherein the cancer is liver cancer.
- 59. (New) The method of claim 52, wherein the cancer is bone cancer.
- 60. (New) The method of claim 38 or 39, wherein the composition comprising Coenzyme Q10 is administered with an additional anti-cancer agent.
- 61. (New) The method of claim 60, wherein the additional anti-cancer agent is a chemotherapeutic agent.

62. (New) The method of claim 61, wherein the chemotherapeutic agent is selected from the group consisting of cyclophosphamide, taxanes, busulfan, methotrexate, daunorubicin, doxorubicin, melphalan and cladribine.
63. (New) The method of claim 61, wherein the chemotherapeutic agent is selected from the group consisting of vincristine, vinblastine, chlorambucil, tamoxifen, taxol, camptothecin, actinomycin-D, mitomycin C and combretastatin.
64. (New) The method of claim 61, wherein the chemotherapeutic agent is selected from the group consisting of cisplatin, etoposide, adriamycin, verapamil and podophyllotoxin.
65. (New) The method of claim 61, wherein the chemotherapeutic agent is 5-fluorouracil.
66. (New) The method of claim 60, wherein the additional agent is an anti-angiogenic agent.
67. (New) The method of claim 60, wherein the additional anti-cancer agent is co-administered with the composition comprising Coenzyme Q10 to the subject.
68. (New) The method of claim 60, wherein administration of the additional anti-cancer agent precedes administration of the composition comprising Coenzyme Q10 to the subject.
69. (New) The method of claim 60, wherein administration of the additional anti-cancer agent follows administration of the composition comprising Coenzyme Q10 to the subject.
70. (New) The method of claim 38 or 39, wherein treatment results in inhibition of tumor cell growth in the subject.
71. (New) The method of claim 38 or 39, wherein treatment results in an increase in apoptosis of tumor cells in the subject.
72. (New) The method of claim 38 or 39, wherein treatment results in inhibition of tumor-mediated angiogenesis in the subject.

73. (New) A method for inhibiting tumor cell growth in a subject, the method comprising topically administering to a subject having a tumor a pharmaceutical composition comprising Coenzyme Q10, thereby inhibiting tumor cell growth in the subject.
74. (New) The method of claim 73, wherein the subject is human.
75. (New) The method of claim 73, wherein the pharmaceutical composition comprising Coenzyme Q10 is formulated as a topical cream.
76. (New) The method of claim 73, wherein the pharmaceutical composition comprising Coenzyme Q10 is liposomal.
77. (New) The method of claim 73, wherein the pharmaceutical composition comprises about 0.01% to about 30% w/w of Coenzyme Q10.
78. (New) The method of claim 73, wherein the pharmaceutical composition comprises about 1% to about 25% w/w of Coenzyme Q10.
79. (New) The method of claim 73, wherein the pharmaceutical composition comprises about 1% to about 20% w/w of Coenzyme Q10.
80. (New) A method of inducing apoptosis in a tumor cell in a subject, the method comprising topically administering to a subject having a tumor a pharmaceutical composition comprising Coenzyme Q10, thereby inducing apoptosis in a tumor cell in the subject.
81. (New) The method of claim 80, wherein the subject is human.
82. (New) The method of claim 80, wherein the pharmaceutical composition induces apoptosis in at least about 30% of tumor cells.
83. (New) The method of claim 80, wherein the pharmaceutical composition induces apoptosis in about 50% of tumor cells.

84. (New) The method of claim 80, wherein the pharmaceutical composition induces apoptosis in about 60% of tumor cells.
85. (New) The method of claim 80, wherein the pharmaceutical composition induces apoptosis in about 75% of tumor cells.
86. (New) The method of claim 80, wherein the pharmaceutical composition induces apoptosis in about 90% of tumor cells.
87. (New) The method of claim 80, wherein the pharmaceutical composition induces apoptosis in about 99.9% of tumor cells.
88. (New) The method of claim 80, wherein the pharmaceutical composition comprising Coenzyme Q10 is formulated as a topical cream.
89. (New) The method of claim 80, wherein the pharmaceutical composition comprising Coenzyme Q10 is liposomal.
90. (New) The method of claim 80, wherein the pharmaceutical composition comprises about 0.01% to about 30% w/w of Coenzyme Q10.
91. (New) The method of claim 80, wherein the pharmaceutical composition comprises about 1% to about 25% w/w of Coenzyme Q10.
92. (New) The method of claim 80, wherein the pharmaceutical composition comprises about 1% to about 20% w/w of Coenzyme Q10.
93. (New) A method of inhibiting tumor mediated angiogenesis in a subject, the method comprising topically administering to a subject having a tumor a pharmaceutical composition comprising Coenzyme Q10, thereby inhibiting tumor mediated angiogenesis in a subject.
94. (New) The method of claim 93, wherein the subject is human.

95. (New) The method of claim 93, wherein the pharmaceutical composition comprising Coenzyme Q10 is formulated as a topical cream.

96. (New) The method of claim 93, wherein the pharmaceutical composition comprising Coenzyme Q10 is liposomal.

97. (New) The method of claim 93, wherein the pharmaceutical composition comprises about 0.01% to about 30% w/w of Coenzyme Q10.

98. (New) The method of claim 93, wherein the pharmaceutical composition comprises about 1% to about 25% w/w of Coenzyme Q10.

99. (New) The method of claim 93, wherein the pharmaceutical composition comprises about 1% to about 20% w/w of Coenzyme Q10.
